NAUGATUCK VALLEY COMMUNITY COLLEGE
PROGRAMMER / ANALYST
(Community College Professional 17)
12 Month Tenure Track Position

PLEASE FOLLOW THE SPECIFIC APPLICATION FILING INSTRUCTIONS AT THE BOTTOM OF THIS PAGE!

Open To: The Public

Location: Naugatuck Valley Community College

Minimum Salary: $54,704 –negotiable based on experience, approximate annual (subject to collective bargaining increase), plus excellent medical insurance, retirement and related fringe benefits.

Closing Date: August 7, 2014

Anticipated Starting Date: Fall 2014

Hours: 35 hours per week, this includes evenings and Saturdays

MINIMUM QUALIFICATIONS:

Bachelor's degree in Computer Science or other relevant field and two years of programming applications and solutions experience.

Applicants who do not meet the minimum qualifications as stated are encouraged to put in writing precisely how their background and experience have prepared them for the responsibilities of this position. They must also provide appropriate references. Exceptions to the degree requirements may be made for compelling reasons.

RESPONSIBILITIES:

The Programmer/Analyst uses contemporary analysis, design, and programming methodologies and tools to translate authorized user requests into computer applications, reports, and services. This entails the analysis of existing procedures and programs, framing and explication of user requirements, the design of alternative solutions, the acquisition of application modules/programs and/or writing of new modules/programs and/or modification of existing modules/programs, and the implementation of new systems components, including user training and the ability to administer, design and program SQL databases and queries. The Programmer/Analyst is accountable for assuring that College faculty, staff and administrators have access to quality computer software through effective performance in the essential areas of development of specifications; modifications; user training and support and programming activity documentation.

The Programmer/Analyst uses design and development tools such as Visual Studio and MS SQL. The programmer will also need to utilize a variety of programming languages and technologies such as, C#, VB, XHTML, ASP.NET, JavaScript, CSS and XML. Further oversight responsibilities include Banner and Active Directory.
